Quantum Bio•Inorganic Chemistry Society

Call for Nominations for the

Quantum Bio-Inorganic Chemistry Society Award

The Quantum Bio-Inorganic Chemistry Society e.V., founded in 2018, aims to advance science and research in theoretical and computational chemistry applied to questions in inorganic chemistry and bioinorganic chemistry, including any method developments that benefit these areas of chemistry.

The QBIC Society opens a new call for nominations for the *Quantum Bio-Inorganic Chemistry Society Award*. The award is intended to recognise outstanding contributions in the field of inorganic and bioinorganic chemistry that were achieved with theoretical, quantum chemical or computational methods. It will recognise *a specific body of work* that established new chemical or physical insights into a long-standing question, developed a new method or concept, or defined a new research direction. Nominations shall state the specific contribution, which may be published in one paper or a series of papers, and how this work has impacted the research field. The committee takes into account the academic age of the nominees; please note that the award is not aimed at a specific career stage or intended as a lifetime achievement award. Information on past awardees can be found on the website of the society, https://www.qbicsoc.org.

The awardee(s) will present their research at a special award lecture during the upcoming Conference of the QBIC Society (QBIC-VIII), which will be held on **May 24-28**, **2027**, at the **IISc Bangalore**, India.

Nominations take the form of a letter addressing all points above and a CV of the nominee. Nominations are due on **January 15, 2027**, and shall be e-mailed to the Secretary General of the QBIC Society: vkrewald@uni-mainz.de.

The decision by the award committee, consisting of the elected board members of the QBIC Society e.V. and up to three additional advisors, is final and cannot be disputed. Self-nominations and nominations by the board members are not considered.
